

## WCRM Position Description

### **Crew Member**

Job Description: Will conduct archaeological investigations / excavations; screen soil deposits; take accurate field notes; draw accurate profiles and plan views; use a digital camera; record archaeological field data; process (wash and mark) and perform basic analysis of artifacts; re-box and re-bag artifact collections for final curation.

Role: Crew Members have no supervisory responsibilities. This position reports directly to a Crew Chief or Field Supervisor when doing fieldwork and to a Laboratory Supervisor or Laboratory Manager when working in the lab.

Crew Member Competencies: A minimum of a Bachelor's Degree in Anthropology, History, or related field and attended an archaeological field school. Previous experience on Phase I, II and/or data recovery projects. May require overnight travel for upwards of a 10-day time period. Must be able to undertake a moderate to high level of physical activity. Must have a valid driver's license. Ideal candidate must have knowledge of basic field excavation techniques, ability to process (wash and mark) recovered archaeological artifacts, properly fill out field and lab forms, perform extensive manual labor including excavation with shovels and moving buckets and wheelbarrows filled with dirt. Must be able to extensively perform bending, kneeling, standing and lifting and carrying objects weighing 50 lbs. Must have a tolerance for working in outdoor environments, prolonged walking or standing on various terrain in a wide range of weather conditions.

### Minimum Qualifications:

**Education:** A minimum of a Bachelor's Degree in Anthropology, History, or related field and attended an archaeological field school.

**Experience:** Previous experience on Phase I, II and/or data recovery projects.
